- Smart temperature control Anti dry burning function.
- Best pure flavor & smart temperature control technology .
- Smart battery protection.
- Easy and safe refilling system.
- Also suitable for CBD / THC oil.

The Kit Includes

- 1) 1 x Vape Device
- 2) 2 x Cartridges 1.0ML(No e-liquid)
- 3) 1 x USB Cable
- 4) 1 x User Manual

Specifications

Size	22 * 65 * 12 mm
Weight	16g
E-liquid capacity	1.0ml
Battery Capacity	350mAh built-in rechargeble
Standby Current	<20uA (No-load) <100uA (Load)
Output Wattage	10W - 15W
Resistance	1.5 ohm
Coil material	Core cotton
Charging	DC 5V, 600mA, Micro USB
Charging time	40 minutes

Our Hearty Service

Warranty Period: 6 Months from the Purchase Date. Within the 6 Months, some items may not be eligible for service due to misuse, damage, or other failures caused other than by manufacturer defects or premature failure. How to fill with e-liquid

1. Pull out the pod;
2. Pull out the rubber plug on the slot;

3. Add e-liquid through the slot;
4. Press the rubber plug back carefully and firmly.

Please use a securely attached nozzle no less than 6mm long when refilling e-liquid

PY-R1 Device

- 1. Large battery capacity: Built-in 400mAh rechargeable battery.
- 2. When vaping, the LED light will turn white; without pod, the LED light will flash 4

- 3. 8 seconds protection: When the power button is held for longer than 8 seconds, the battery will automatically shut down the output and LED light will flash 5 times.
 - 4. When charging, the LED shows different colors according to the power status. Red light will on when battery power is lower than 34% (battery voltage <3.6V); Blue light will on when power is between 35% to 64% (battery voltage: 3.6V-3.9V); and green light will on when power is between 65% to 100% (battery voltage: 3.9V-4.08V). After fully charged (battery voltage >4.08V).
 - 5. Short Circuit Protection: if a load short circuit is detected, the white LED light will flash 4 times.
 - 6. Low Voltage Protection: when battery capacity is lower than 3.3V, the LED light will flash 15 times.
 - 7. Lithium Battery Protection: over discharge voltage is 2.4V, overcharge voltage is 4.3V, overcharge current is 1A.
- Note: After vaping for some time, if there is any water vapor gathering on the contact point between the pod and the mod.

Attention

1. When liquid filled in the pod, please wait 30 seconds to make sure coil absorbed oil.
2. In order to ensure the taste, we used the disposable pod. We suggest to replace it with a new cartridge so as to ensure the performance and flavor.
3. Please clean up the accumulated E-liquid in time, avoid getting e-liquid into your mouth directly.
4. To avoid e-liquid penetrating into the device and shorten its life-circle, please remove pod if the device is not going to be used for a long period.
5. Please refill the pod when the e-liquid is nearly used out to avoid dry-burning of the pod.
6. Please do not drop, throw or mishandle this product as the outer shell or inner components may become damaged.
7. In order to prolong the operation of your product, please keep it away from excessive temperature and humid environment.
